

Catalina U.S. Sabot

The U.S. Sabot by Catalina continues the tradition of the thousands of Sabots sailing today as the perfect first boat for the beginning sailor and popular with junior sailing programs for its simplicity and safety.

Equipped with the racing package, the Sabot offers all the sail controls of a larger boat, so learning sailors can develop the full range of sail trimming skills. The U.S. Sabot is built to withstand the tough use of a learning sailor. The full flotation hull is made of inner and outer hand-laid fiberglass parts for strength and durability. The mast is tapered fiberglass and the boom is anodized aluminum.

The Catalina U.S. Sabot. The number one fun boat for sailors of all ages.

Catalina 13

Catalina 13 principal specifications*

Length Overall	4.17m	13' - 8"
Length of Hull	4.17m	13' - 8"
Beam	1.42m	4' - 8"
Distance from W/L to masthead	5.97	19' - 8"
Rated Sail Area	6.97m ²	75 sq.ft.
Approximate Weight	58kg	128 lbs.

The Catalina 13 is simple for a beginner or junior sailor to rig and handle, yet sophisticated enough to satisfy experienced small boat sailors.

The sleek styling and functionally comfortable deck design combined with a controllable high performance rig, are the result of an extensive development program with input from some of the world's best sailors. The hull shape is pure performance. This means the Catalina 13 planes quickly and delivers the best upwind performance in her class.

First class hardware, anodized spars, precision molded daggerboard and rudder add up to lasting quality. Fiberglass hull and gel coat that is hand laminated, deck with molded in non-skid surfaces are your assurance of an affordable value that will last.

The Catalina 13. Conceived and built to be the best in its class.
